EDUCATION

Bachelor of Technology, Artificial intelligence and Machine Learning August 2022 - April 2026
Aditya Engineering College | Surampalem, AP **CGPA: 7.8**

Senior Secondary (Class XII) - MPC June 2020 – April 2022
Jaggayyapet Junior College | Jaggaiahpet, AP **CPA: 8.22**

SKILLS

- **Programming Languages:** Python, C, C++,
- **Backend Development:** Node.js
- **Frontend Technologies:** React.js, React Native
- **Development:** HTML, CSS, JavaScript
- **Databases:** MongoDB, SQL.
- **Development & Collaboration:** Git, Google Colab, Visual Studio, Jupyter Notebook,GitHub.
- **Python Libraries: Numpy, Pandas**

EXPERIENCE

Full Stack Intern - Technical Hub Pvt Ltd View June 2024 – July 2024

- Developed and implemented multiple **HTML, CSS, and JavaScript** codes to build responsive and interactive web applications.
- Participated in the **ISHIP program**, showcasing technical and creative skills through project demonstrations and collaborative coding tasks.
- Designed and built a **Financial Tracker Web Application** that allows users to track income, expenses, and savings goals with personalized visual templates.
- Contributed to multiple small projects, enhancing proficiency in **front-end development** and gaining hands-on experience with real-world coding challenges.
- Gained a comprehensive understanding of **web development best practices**, focusing on user experience, responsive design, and cross-browser compatibility.

Full Stack Intern (React Native) - Technical Hub Pvt Ltd View May 2025 – June 2025

- Developed and maintained cross-platform mobile applications using React Native, ensuring smooth user experience on both iOS and Android devices.
- Worked on both frontend UI components and backend integration, utilizing REST APIs to connect mobile apps with server-side data and functionality.
- Designed and built **Ziwexa**, a full-featured mobile app connecting users seeking hostels, PGs, or apartments with property owners through a dual-interface system
- Applied best practices for performance optimization, state management, and cross-platform compatibility.
- Enhanced skills in state management, navigation, performance optimization, and deployment throughout the mobile app development lifecycle.
- Focused on user-centric design with clean UI, efficient workflows, and responsive layouts, enhancing both user experience and functionality.

ACADEMIC PROJECTS

Zewixa – Mobile Application: GitHub

Technologies: React Native, Node.js, Express, MongoDB

- Developed a dynamic mobile application that connects users looking for hostels, PGs, or apartments with property owners. The app offers two interfaces:
  For Users: Search for accommodations based on location, explore listings, manage payments, and communicate with owners.
  For Owners: Advertise hostels or apartments, manage listings, track student payments, and handle messages.
- Designed with a user-friendly interface, seamless navigation, and efficient backend integration to enhance the accommodation search, listing, and payment management experience.

Workout & Fitness Platform: GitHub

Technologies: React Native, Node.js, Express, MongoDB

- Developed a comprehensive workout recommendation platform that suggests personalized exercise videos based on user inputs such as weigh, type, gender and some other inputs
- Implemented a **React-based frontend** with dynamic video rendering, category-based filtering, and an intuitive UI for seamless navigation.

- Enhanced the platform with an **e-commerce store**, allowing users to purchase **gym equipment, supplements, and personalized diet plans** based on their fitness goals.

OpenTab – Social Networking Application: GitHub

Technologies: React Native, Node.js, Express, MongoDB

- Developed a platform for users to team up, share concepts, and collaborate in virtual spaces.
- Designed two interactive user interfaces:
  Idea Creators: Present concepts, form teams, track progress (Git status), upload files (flowcharts), and collaborate.
  Team Seekers: Discover teams, join projects, and contribute meaningfully.
- **AI Matching System**: Analyzes user inputs, skills, and interests to recommend the most compatible teams, ensuring efficient collaboration and idea execution.
- Built with an **intuitive UI, seamless navigation, and a robust backend** to streamline networking and project management.
- Helps users **find co-founders, connect with like-minded individuals, and showcase ideas**, fostering innovation and collaboration.

CERTIFICATION

- JavaScript Programmer – Hacker Rank Certified
- Python Programmer – Hacker Rank Certified
- MongooDB Developer's Toolkit - GeekForGeeks

ACHIEVEMENTS

- Solved 300+ problems on Leetcode
- Solved 400+ problems and earned 3-star rating on GeekForGeeks
- Achieved 2-star coder status with a rating of 1423 on CodeChef
- Earned 5-star badges on HackerRank in Python, C, C++, Problem Solving, and SQL
-
